

Subject: Infection control product availability and procedures

Date: February 17, 2020

The outbreak of the novel coronavirus is spreading globally and putting stress on the supply chain for infection control products such as masks, gowns, and gloves (known as Personal Protective Equipment, or PPE). Henry Schein is doing all that it can to equitably distribute these products to existing customers and to act responsibly in helping medical professionals combat the outbreak.

To that end, Henry Schein has instituted the following guidelines and procedures to manage the distribution of PPE to customers in the United States:

- We are accepting orders **ONLY** from existing customers for PPE.
 - Sales of restricted items to new customers will be canceled.
- We are shipping PPE **ONLY** to health care providers or to those organizations with health-care related responsibilities, such as schools, workplace health clinics, athletic teams, and certain government entities.
 - Customers that cannot purchase from Henry Schein at this time, even at restricted quantities, are pharmacies, wholesalers, dealers, exporters, federal dealers/contractors, government subcontractors, resellers, and individuals.
- We will **NOT** sell any restricted items above list price.
- On all restricted items, customers can order **ONLY** up to the maximum quantity restriction during a 5-business day period, which differs by product.
 - Stocked items cannot be drop-shipped.
- Please keep in mind, when discussing orders with customers, that including both restricted items and generally available items in one order could delay delivery of the entire order.
- No exceptions to the guidelines above will be made without executive-level approval.

We are working closely with our manufacturing suppliers to find additional sources of supply of PPE, and we will update you as developments occur that affect the availability of product. We thank you for your patience and understanding as we collectively work through the supply chain challenges of the outbreak.

Infection Prevention and Control - Coronavirus Preparedness

Due to the coronavirus outbreak, we are experiencing higher than normal demand globally for infection control products such as masks, goggles, and face shields, among other items. We are working with our manufacturing and supply chain partners, as well as global health organizations including the Pandemic Supply Chain Network, the World Health Organization, the Chinese Ministry of Health, and the Centers for Disease Control & Prevention, to address shortages as they occur. Given this situation and acute market needs, we anticipate disruptions to orders for certain infection products in various markets.
